International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 7, ISSUE Nos 1–5

ISSUE No. 1 January–March

Editorial 1

An Analytic Expression for the Magnitudes of the Signal and Intermodulation Outputs of an Ideal Hard Limiter, Assuming *n* Input Signals Plus Gaussian Noise: G. M. Comparetto and D. R. Ayers 3

On the Definition of Compandor Advantage and its Analytical Calculation: J. P. A. Albuquerque 9

Understanding Signals from GLONASS Navigation Satellites: S. A. Dale, P. Daly and I. D. Kitching 11

New Rain Rate Analyses to Assess Rain Attenuation on Satellite EHF Communications: P. Tattelman 23

Prediction of Rain Effects on Earth–Space Communication Links Operating in the 10 to 35 GHz Frequency Range: W. L. Stutzman 37

Asymptotic Analysis of Unslotted Frequency-Hop Multiple-access without Side Information: S. W. Kim and S. Kim 47

SS/TDMA Time Slot Assignment with Knowledge-base and Prolog Implementation: C. A. Pomalaza-Raez 55

BOOK REVIEWS 65

ISSUE No. 2 April–June

The Development of a Coded 8 PSK Modem Using Digital Signal Processors: R. Heron, P. Marston, P. Garrett, I. Reece and R. Stevens 67

The Data Station Controller of the Apollo System: J. Pahl 79

Some New Hybrid ARQ Techniques for High Error Rate Conditions: G. Benelli 85

Analytical Evaluation of Average Bit Error Rate for the Land Mobile Satellite Channel: D. Cygan 99

On-board Non-linear Circuitry for K_u-band Active Arrays: F. Giannini, G. Leuzzi and M. Ruggieri 103

ISSUE No. 3 July–September

(Special Issue on Channel Coding for Satellite Communications)

Editorial 111

Guest Editorial 113

Error Correcting Codes for Fast Frequency-hopped *M*FSK Spread-spectrum Satellite Communications under Worst Case Jamming: Q. Wang, T. A. Gulliver, V. K. Bhargava and E. B. Felstead 115

Some Practical Issues in the Design and Application of a VLSI FEC Chip: Q. Wang, R. D. Nicholson and L. Y. Onotera 129

Abstracted/indexed by Cambridge Scientific Abstracts, Current Contents, Engineering Index, Information Reports & Bibliographies, INSPEC, Telecommunications Abstracts and Telescope Networks

Channel Coding for Satellite Mobile Channels: K. H. H. Wong, L. Hanzo and R. Steele 143

Comparison of Advanced Coding and Modulation Schemes for Multicarrier Satellite Communication Systems: S. Benedetto, M. Pent and Z. Zhang 165

Coding for the Gaussian Channel: the Promise of Weighted-output Decoding: G. Battail 183

Efficient ARQ Schemes for Error Control of Satellite Channels: R. Fantacci 193

An Anti-jam Packet Data Satellite Link: G. Fairhurst and C. T. Spracklen 201

Low Complexity Concatenated Coding Schemes for Digital Satellite Communications: A. Brine, P. G. Farrell and R. A. Harris 209

An ARQ/FEC Coding Scheme for Land Mobile Communication: I. C. Ferebee, D. J. Tait and D. H. Taylor 219

Algebraic Properties of BCH Codes Useful for Decoding: V. C. da Rocha, Jr., B. K. Honary and S. D. Bate 225

ISSUE No. 4 October–November

(Special Issue on Surface Acoustic Wave Technologies for On-board Applications)

Editorial 231

Guest Editorial 233

Review of SAW Devices and their Signal Processing Applications in Space Communications: F. Ananasso 235

SAW Chirp Filter Technology for Satellite On-board Processing Applications: M. D. Shaw, N. D. J. Miller, A. P. Malarky and D. H. Warne 263

SAW-based Chirp Fourier Transform and its Application to Analogue On-board Signal Processing: P. M. Bakken and A. Rønnekleiv 283

SAW and Digital Technologies in Multicarrier Demodulators: E. Saggese and G. Chiassarini 295

SAW Filter Technology in Support of Mobile Communications at ESA: R. Coirault and J. Benedicto 307

Routeing and Filtering in the ETS-V Transponder for Mobile Communication Experiments: K. Kondo, Y. Hashimoto and T. Ide 315

Design of SAW Filters in SS-FDMA Routers for Mobile Satellite Systems: F. Ananasso and J. M. Deacon 321

The Use of SAW Oscillators to Suppress FM Noise in Local Oscillators for On-board Satellite Applications: A. N. Farr 343

GHz-range Surface Acoustic Wave Interdigital Transducers and Applications: K. Yamanouchi 355

SAW Devices: Space Qualification and Reliability Issues: M. Roush and J. Maynes 361

On-board Frequency Demultiplexing Magnetostatic Wave Technologies: P. V. De Santis 373

ISSUE No. 5 December

Editorial 379

A Technique for the Fine Longitude Control of a Geostationary Satellite as Demonstrated on INSAT-1B: P. Kale and S. Rangarajan 381

Signal Suppression Effects in an Ideal Hard-limiter for the Many-carrier Case: G. M. Comparetto 395

Distance Measures for Viterbi Decoding of Coded and Bandlimited 8PSK Signals: S. W. Cheung and A. P. Clark 399

Performance Study of 16-ary DEQAM Modem for Future Satellite Communication Systems: S. W. Cheung and A. H. Aghvami 413

Performance of a CE16QAM Modem in a Regenerative Satellite System: S. W. Cheung 425

Selective Reject ALOHA/FCFS: An Advanced VSAT Channel Access Protocol: D. Raychaudhuri 435

Author Index 449

Key Word Index 449
